

Wappnet AI

AI Solutions for Scalable,
Intelligent Businesses

Custom AI Development | Conversational AI | Big Data | GenAI Experts

Introduction

The Problem

Businesses struggle to scale and personalize experiences with traditional software.

Our Solution

Wappnet.ai builds AI systems that automate operations, personalize customer journeys, and extract powerful insights from data.

Our Expertise

Wappnet.AI delivers cutting-edge AI and Machine Learning solutions. Our expertise spans Natural Language Processing, Computer Vision, etc., enabling us to tackle complex challenges and drive impactful results.

- **Conversational AI** – AI-powered chat & voice automation
- **Generative AI** – Content & workflow automation with AI
- **Custom AI App Development** – Tailored AI-driven solutions

Our Value Proposition

Driving Innovation & Efficiency

Delivering innovative and reliable AI/ML solutions that drive efficiency, enhance decision-making, and accelerate growth

AI Solutions that Scale

Developing adaptable and future-proof AI/ML solutions

Accelerated AI Implementation

Ensuring rapid deployment and time-to-value for AI initiatives

Transforming Business with AI

Empowering businesses to achieve new levels of efficiency, innovation, and customer satisfaction through the power of Artificial Intelligence.

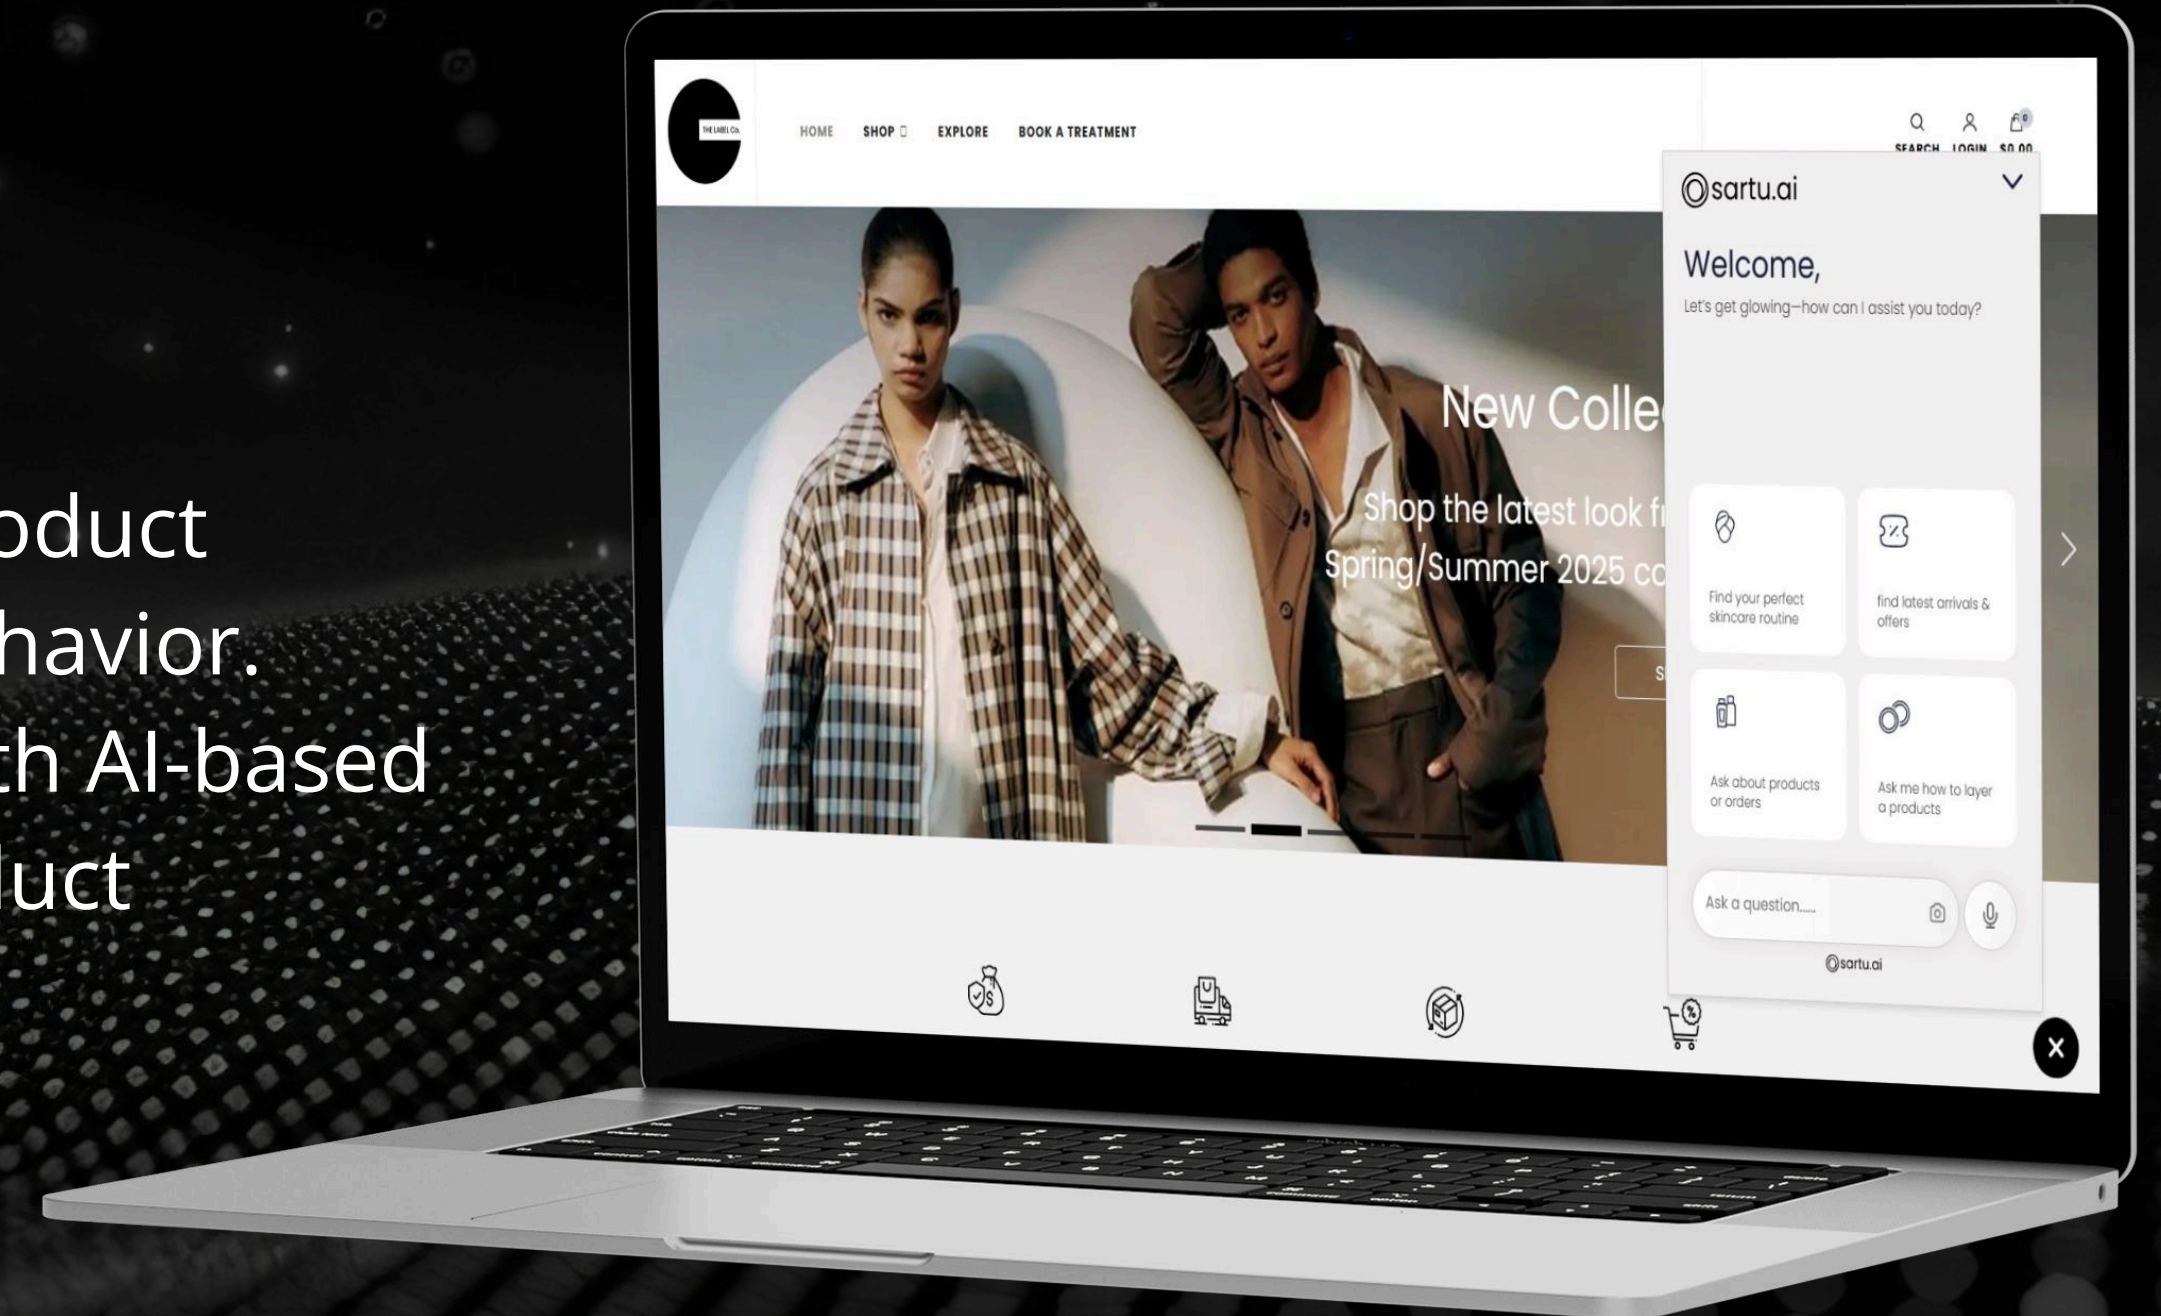

Sartu AI

Sartu AI is a smart shopping assistant that offers personalized product recommendations based on skin analysis, style, and shopping behavior. Sartu AI helped a skincare brand increase conversions by 35% with AI-based skin analysis. E-commerce AI Engine optimized personalized product recommendations, increasing sales by 40%.

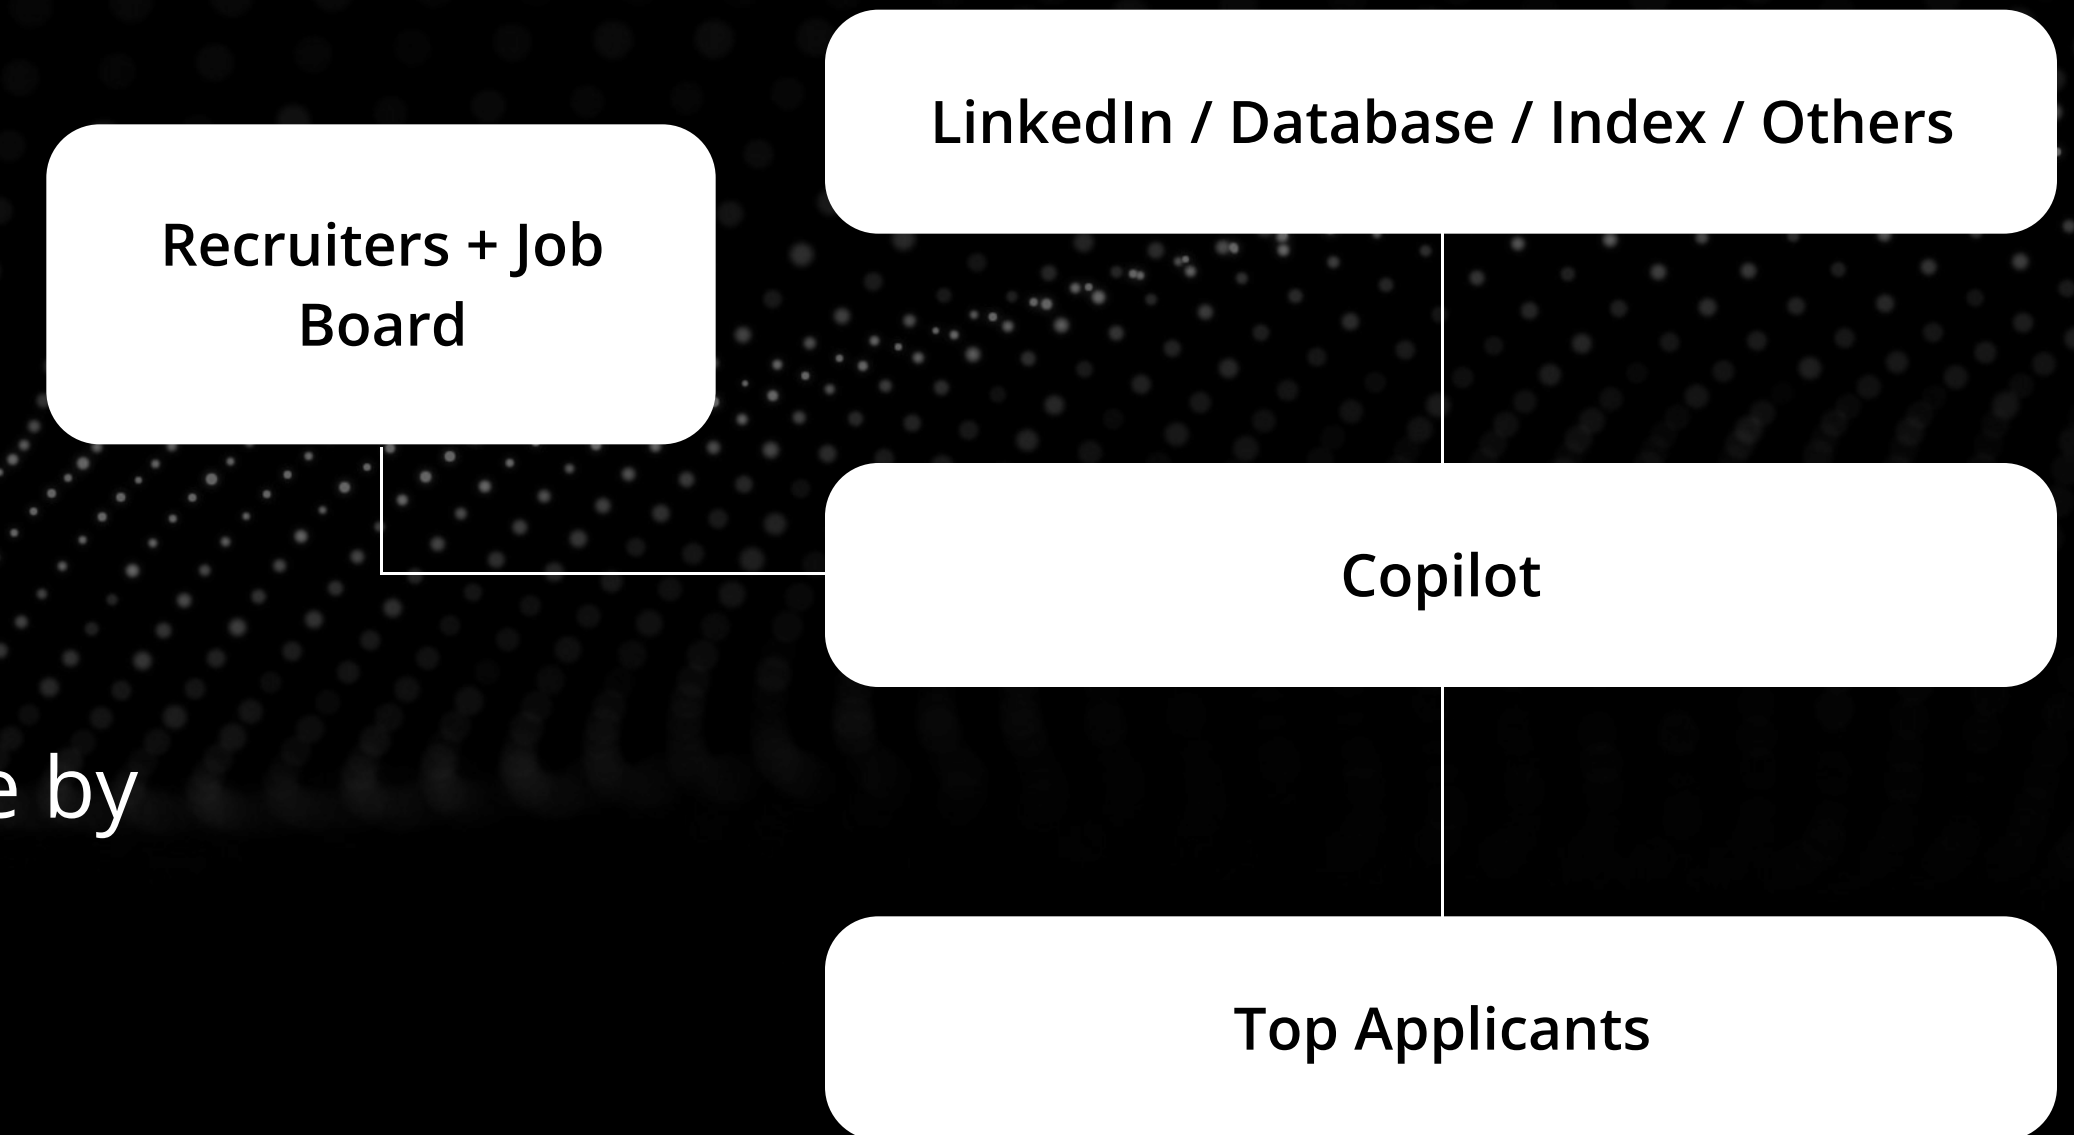

Services

- **Gen AI/ML:** Analyzes user preferences, past purchases, and fashion trends.
- **Computer Vision:** Assesses skin types and product attributes for personalized recommendations.
- **Natural Language Processing (NLP):** Enables human-like conversations and intelligent interactions.
- **Cloud-Based Infrastructure:** Ensures fast response times and seamless scalability.
- **Recommendation Systems:** Suggests products based on user preferences, trends, and past interactions.
- **API Integrations:** Connects with e-commerce platforms, fashion brands, and retailers for real-time product availability.

Recommendation System

The AI-powered Recommendation System helps recruiters find and shortlist candidates by integrating LinkedIn, public profiles, mail inboxes, ATS, and Apollo.io. Recruitment Copilot reduced time-to-hire by 50% for a global hiring firm.

Services

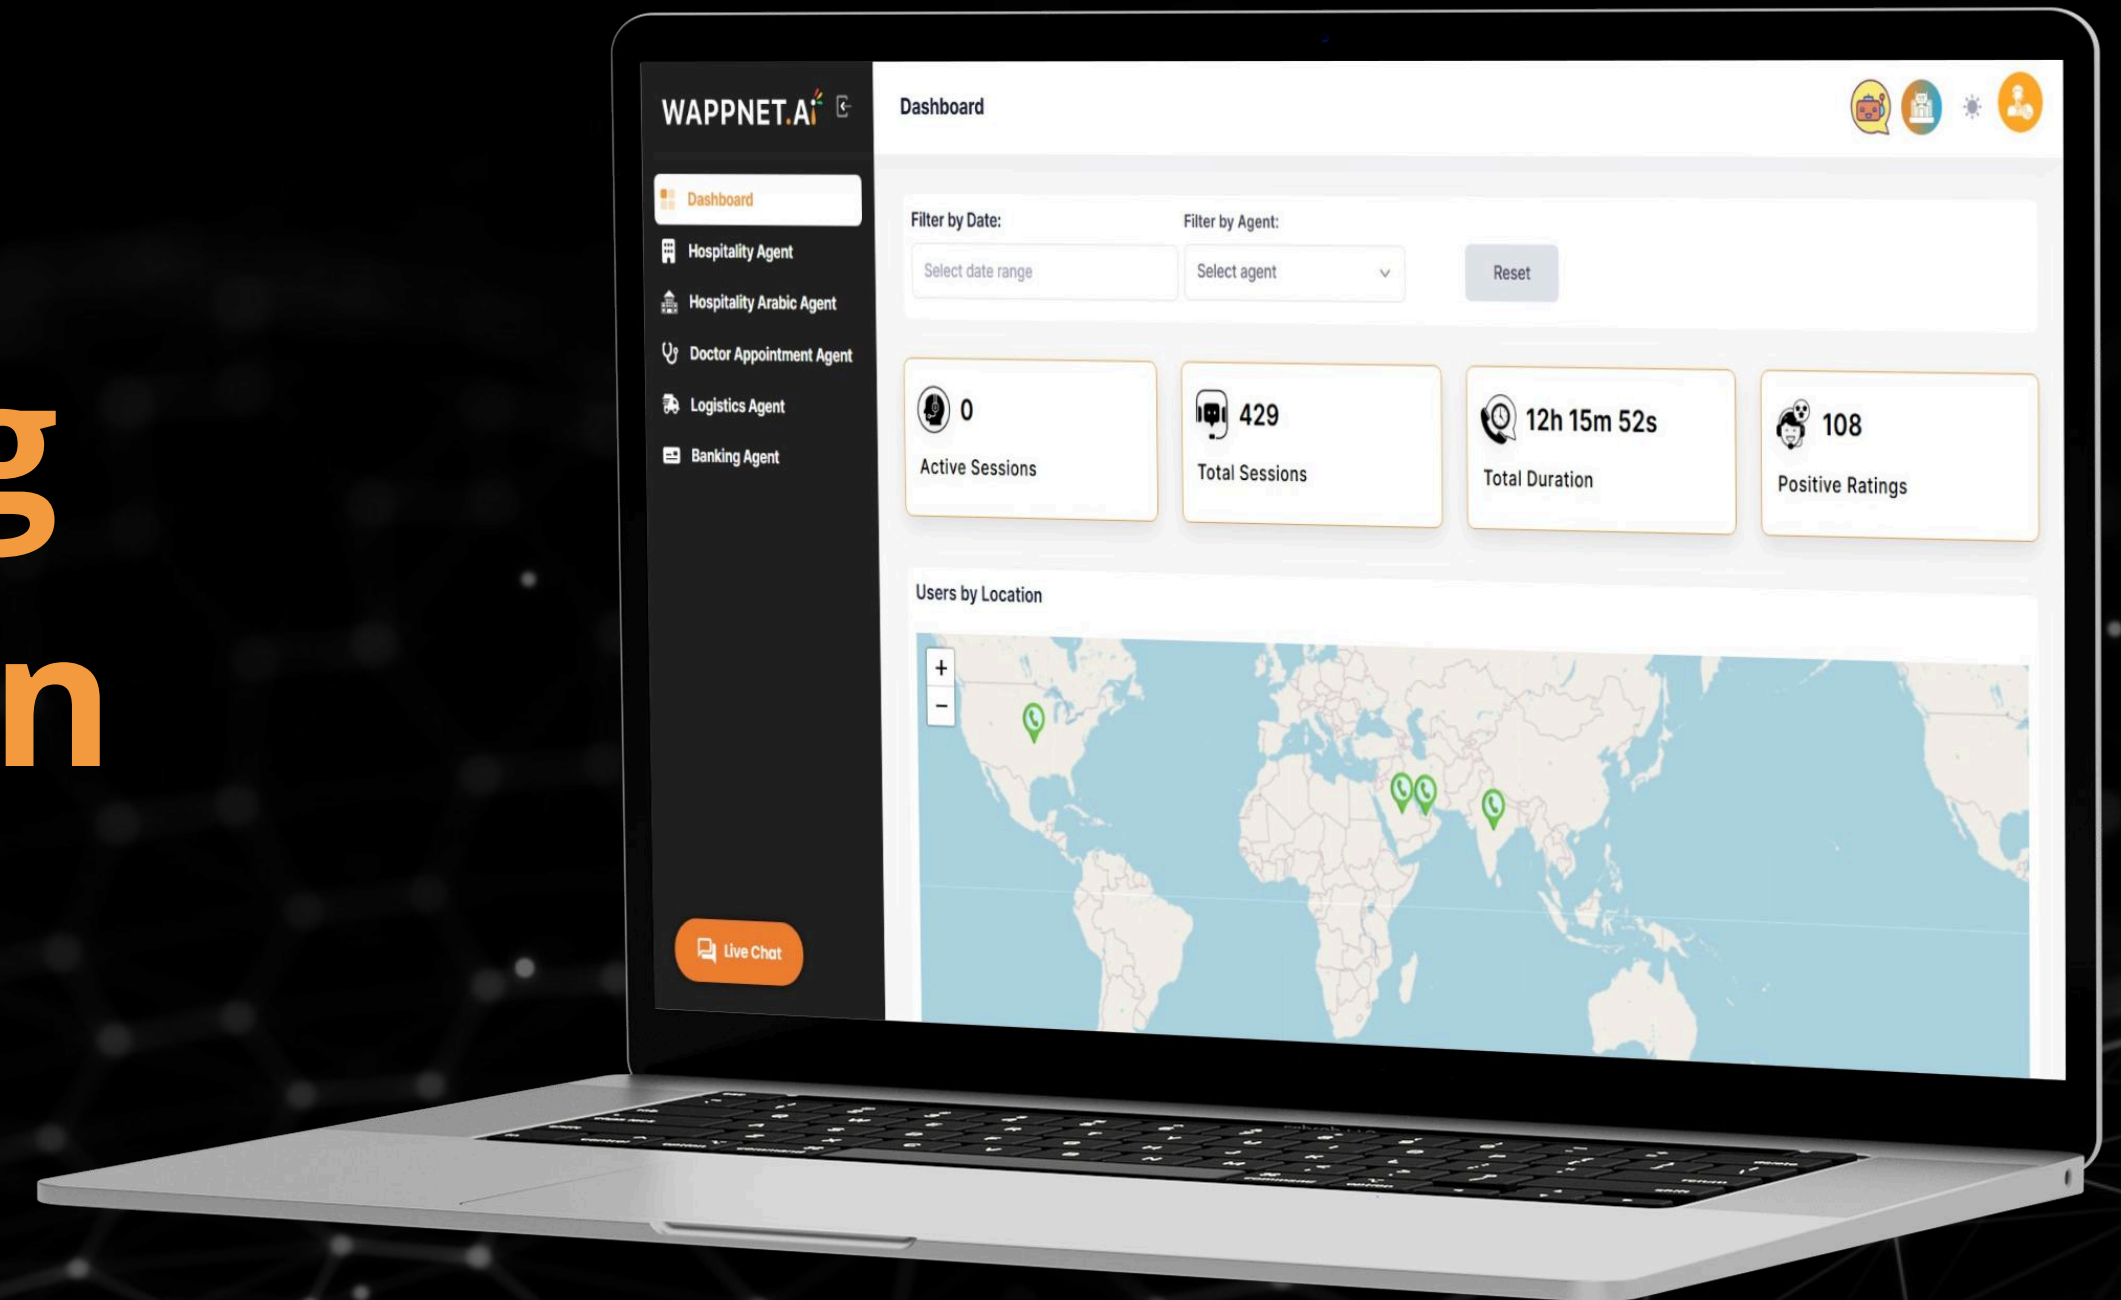

- **Machine Learning (ML):** Analyzes job titles, requirements and run Semantic Search across the sources
- **Generative AI:** Extracts structured JSON properties from the entire unstructured Job Description or job posting URL.
- **Natural Language Processing (NLP):** Classification of highlevel categories for transformation.
- **Cloud-Based Infrastructure:** Ensures fast response times and seamless scalability.
- **API Integrations:** Connects with Database, Elastic Search, Pinecone for real-time results.

Conversational AI: Enhancing Human-Computer Interaction

Conversational AI refers to artificial intelligence systems that enable human-like interactions between users and machines.

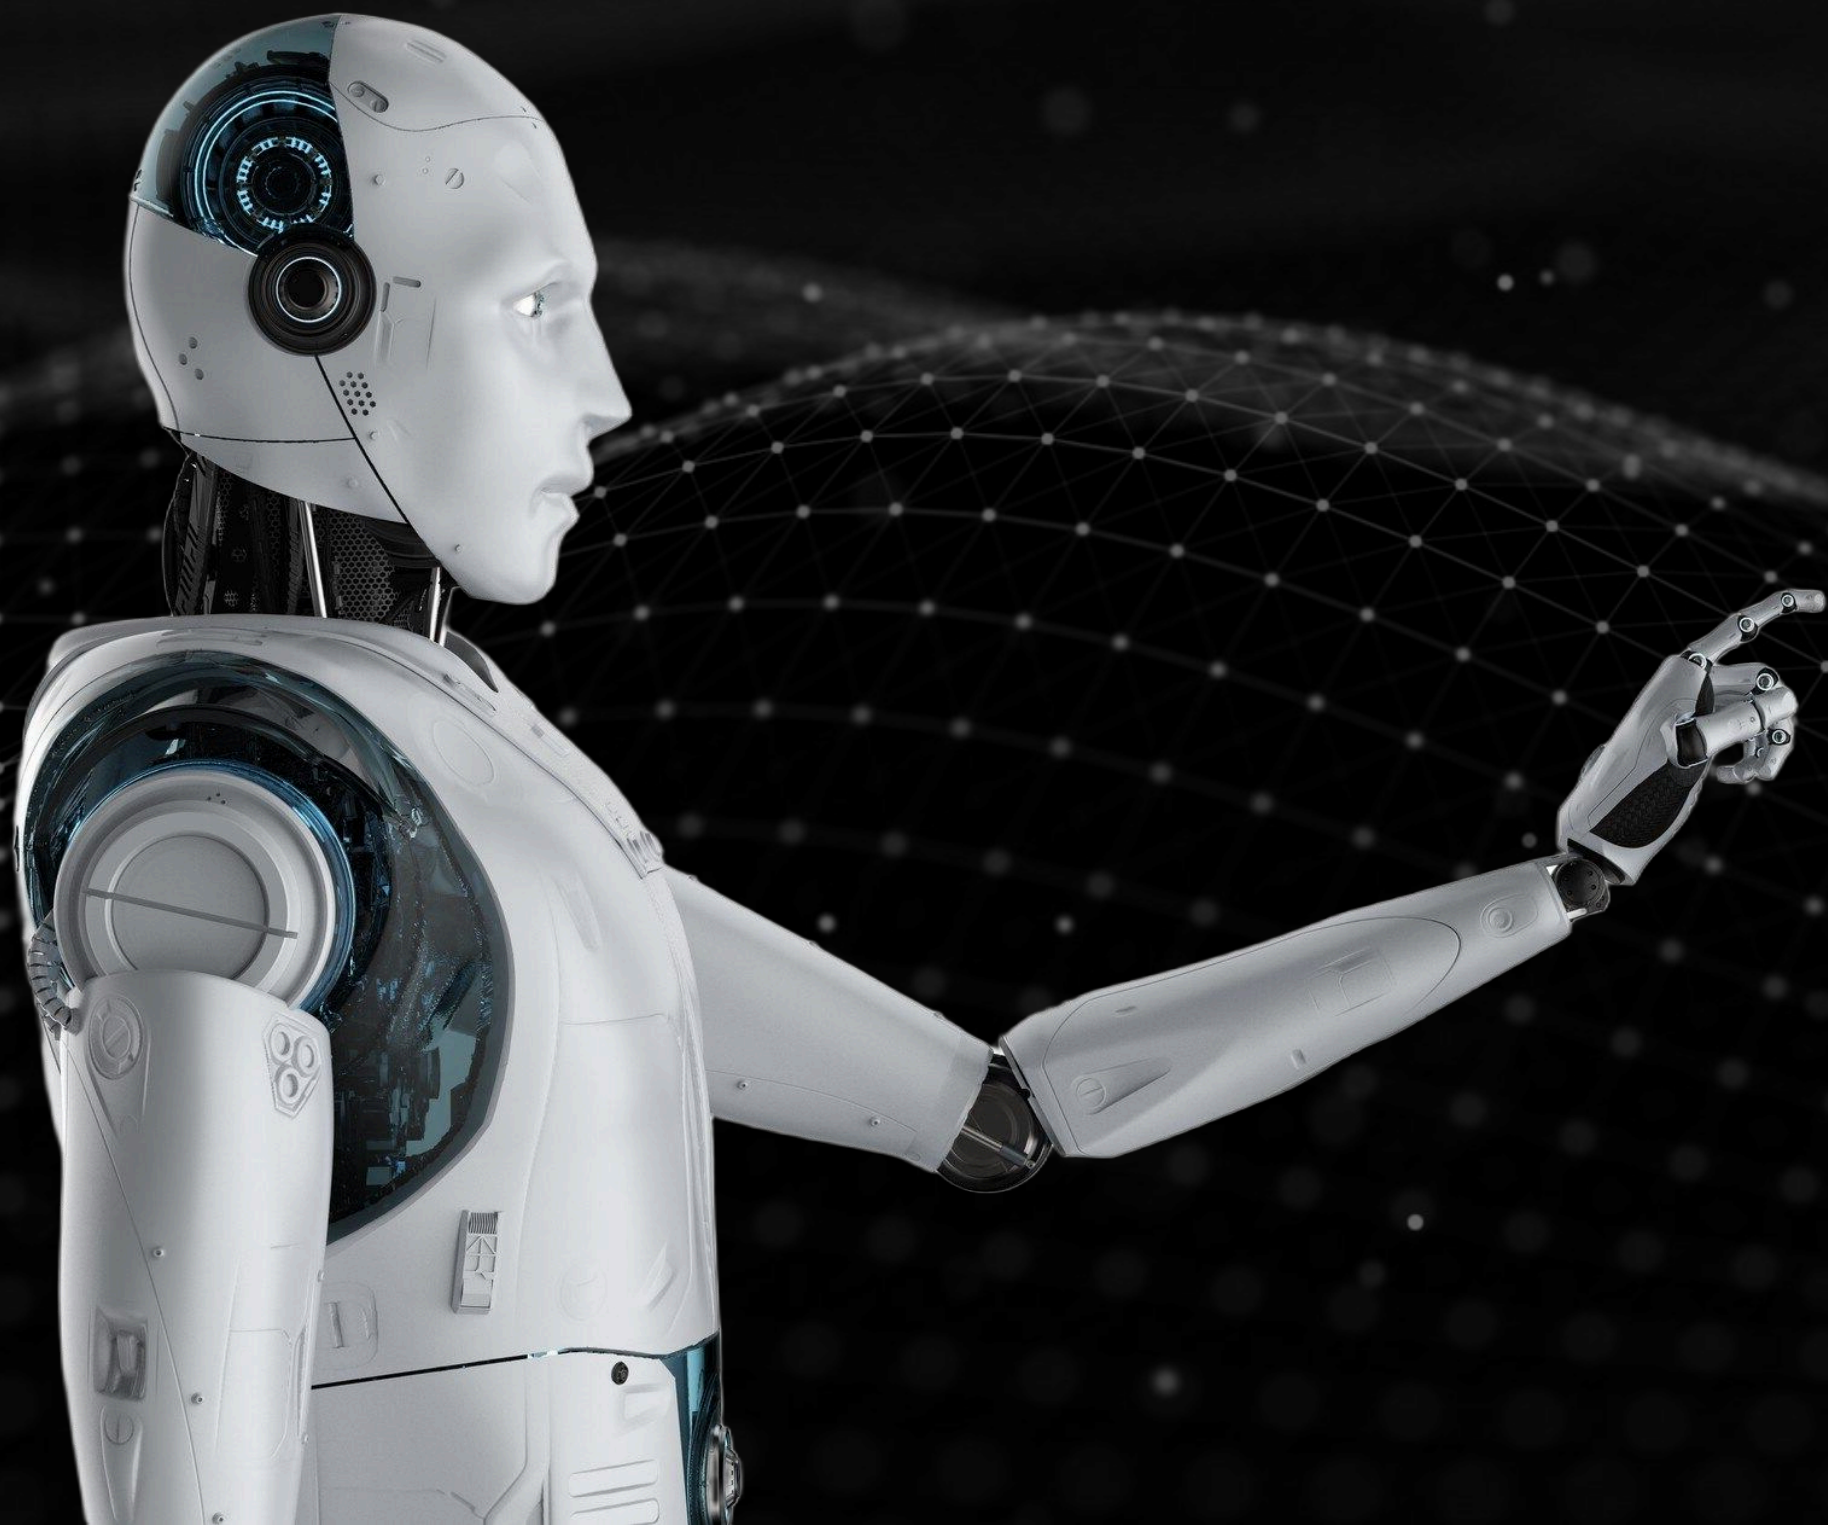

Services

- **Large Language Models (LLMs):** OpenAI's GPT-4o-mini for generating human-like responses.
- **Speech Recognition:** Whisper for converting speech to text accurately.
- **Natural Language Processing (NLP):** Enables AI to understand user queries and generate meaningful responses.
- **AI Agent, Machine Learning & Deep Learning:** AI Agent, Machine Learning & Deep Learning: Continuously improves responses based on user interactions.
- **Retrieval-Augmented Generation (RAG):** Enhances chatbot capabilities by fetching real-time data from external sources.
- **Vector Databases:** PGVector for storing and retrieving embeddings efficiently.

Our Valued Clients & Partners

We are honored to collaborate with global leaders through long-term partnerships.

Industries Served

Wappnet.AI pioneers innovation across industries, driving growth and achieving strategic excellence.

FinTech & Banking

Healthcare & Life Sciences

E-Commerce & Retail

Real Estate & PropTech

Logistics & Supply Chain

Telecommunications

Manufacturing & Automation

EdTech & E-Learning

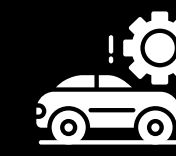

Marketing & Advertising

Government & Smart Cities

AI/ML Business Models: Strategies for Growth

Fixed Cost Model

Wappnet.AI delivers precise, high-quality solutions on time. Our fixed-price model ensures budget certainty, phased payments, and timely project delivery.

Dedicated Model

Wappnet.AI values B2B partnerships. Our Dedicated Hiring model ensures fixed pricing, flexibility, and full resource control, leading to long-term success and strong client relationships.

Hourly Cost Model

Wappnet.AI offers an hourly cost model for flexible projects. We provide estimated timelines, meet deadlines, and follow a Material model for efficient project execution.

Why **Wappnet.ai**?

- **Trusted Worldwide**
- **Decades of Excellence**
- **Industry-Leading Expertise**

Our Vision

The world is undergoing a rapid digital transformation driven by AI and Machine Learning.

We believe that the increasing volume of data, advancements in algorithms, and the need for intelligent automation demand innovative AI/ML solutions that drive growth and efficiency.

Our Mission

To empower businesses with cutting-edge AI and Machine Learning solutions that deliver transformative value.

Partnering with organizations to navigate their AI journey, from strategy to implementation and beyond.
